Access to electronic resources

The UAS Südwestfalen library has extensive collections of e-books, e-journals and scholarly databases.

You can search for and connect to these using the library’s catalogue KAI or DigiLink.

Accessing e-resources:

On campus:

- Via public PC’s, i.e. in the libraries and in the common PC rooms
- Via WiFi on your mobile device. Access to the university’s wireless network is available on every campus and in every library.
- Staff may use their local PC if it is integrated in the campus network (please ask your system administrator)

Off campus:

- Off-Campus-Access
  When "off-campus" and clicking on a link in KAI, DigiLink or DigiBib, you will be routed to the providers site via a proxy server. You will be prompted to enter your username and password for your university account.

- VPN
  Please contact IT Services for more information about using this service: www.fh-swf.de/dvz

Students receive the login data for their personal university account with their matriculation documents.

Most of the e-resources we list are available off-campus to current staff and students of the UAS Südwestfalen.
