23rd International Workshop 2020 in Portugal
April 18th – May 1st, 2020

Portugal is more...

So, you nearly have your degree, are young and motivated but still haven’t found the job you had been hoping for during your studies. What more do you need? Experience! But how are you supposed to be fresh out of university and experienced at the same time? You need more – and that more is to be had at the 23rd International Workshop in Portugal!

Like Portugal, the workshop is more than just what meets the eye. Portugal may be a »small« country but it never fails to exceed expectations. The International Workshop is only two weeks, but is an opportunity to elevate your cv from the countless others. More than you expected? It is more than just a workshop, like Portugal is more than just a country.

Mais do que parece

Ready for more?
The workshop involves a competitive managerial simulation that brings students together from eight countries allowing them to apply what they have learned in the classroom in a business setting. The participants meet as strangers but, to be successful, will depart as teammates. It requires acceptance of other team members’ opinions, appreciation of their input and willingness to lead. More than expected.

What more are you waiting for?!?!

Program details can be found by using the QR code. Contact your local coordinator about your chances of participating! This is more than likely a one-time opportunity. Do not say, “I’ll think about it.”

Do more and be more. Ver para crer

Interested? Contact your local coordinator!
