Why study here?

Multicultural Study Environment

Students at Soest have more than 60 different countries of origin. This means that intercultural communication and cooperation is a vital part of studying at Soest and prepares students for an intercultural workplace. Having worked in international teams is a major advantage for our students when they apply for jobs in international business environments. Our modules are geared towards international business experience and involve close cooperation with international companies. The close partnership with businesses and the practical application of theoretical knowledge is another asset of our Master’s Program.

Greetings by Dr. Eckhard Rutheneyer
Mayor of Soest

“In this age of globalization we are heading for an interconnected global economy demanding global responsibility and sustainability. A program with an international perspective teaching both intercultural and language skills is exactly what international businesses facing global competition are asking for. The intercultural outlook as well as the IT expertise including SAP ERP systems will give our alumni a competitive edge on the job market.”

Further information on the city of Soest and the campus

Soest – An inspired choice

Soest was an important merchant hub of the Hansa league in the 15th century and has retained many medieval features. The town offers good leisure facilities and access to nature as well as good connections to the cities of the Ruhr region. Excellent connections to many international companies nearby can help you get your career started. The campus offers room for studying as well as for relaxing. Modern seminar rooms, computer pools with up to date software (SAP etc.), a well-stocked library, as well as good support by lecturers and professors and a good mentoring network provide an ideal environment for your studies.

Place of Study

Soest Campus

South Westphalia University of Applied Sciences
Department of Electrical Engineering
Lübecker Ring 2
D-59494 Soest
Specific Features

Blended Learning

The IMIS program follows a blended learning approach allowing for flexible and self-paced learning. The first semester is designed as an intensive on-site studying experience while the second semester, taught via distance learning, features practical and international opportunities as part of the »External Option«.

External Option

The second semester with its distance learning approach offers a window for external cooperation. Students can work on all compulsory modules online while completing their electives either as an internship within a company or by studying abroad at one of our partner universities.

International & English Language

Knowledge and skills at the intersection of business administration and IT, embedded in an international and multicultural context, meet the core business competencies required by companies today. 100% English-language, internationally focussed course content as well as partnerships with universities abroad provide students with a truly international experience.

Structure of Study

Sem. | Module
---|---
1 | Business Marketing Management, Corporate Entrepreneurship & Innovation, Journal Club, Business Intelligence, E-Business, Information Management
3 | Current Communication Issues, Research Methods, Master’s Thesis, Colloquium
